

Manual Tata Kelola & Kepatuhan — Tata-Eleven

DOKUMEN INI = SINGLE SOURCE OF TRUTH (SOT) untuk cara kerja, peran, alur, dan kepatuhan tim. Audit-ready. Detail dalam ditautkan (tidak diduplikasi → tidak redundan).

0. Kendali Dokumen (Document Control)

Field	Isi
No. Dokumen	TT-MAN-001 (Tier 1 — Manual/Apex)
Judul	Manual Tata Kelola & Kepatuhan (Governance & Compliance Manual)
Tipe / Rev	Manual · Rev 1.0
Status	Berlaku (Approved)
Klasifikasi	Internal
Pemilik (Owner)	Nami (Delivery) + Kakashi (Lead)
Penyetuju (Approver)	Tata (CEO / Head of Product)
Tanggal Berlaku	2026-06-03
Penomoran	ISO 9001 Document Control — register di INDEX (TT-REG-002)
Siklus Tinjauan	Tiap perubahan struktur/proses, minimal tiap rilis besar
Distribusi	Seluruh 11 persona + Tata
SOT untuk	role, alur kerja, use case, register SOP, pemetaan kepatuhan

1. Tujuan & Ruang Lingkup

Menetapkan **satu acuan resmi** soal: siapa mengerjakan apa (role + RACI), bagaimana request/project mengalir (flowchart), use case tiap peran, daftar SOP, dan pemetaan kepatuhan (COBIT/GCG/ISO). Berlaku untuk semua pekerjaan tim Tata-Eleven.

2. Arsitektur Dokumen — 1 TOPIK = 1 SOT (anti-redundan)

Aturan: tiap topik **cuma dimiliki SATU dokumen (SOT)**. Dokumen lain **MERUJUK**, tidak **menyalin**. Kalau bentrok → SOT yang berlaku. Dokumen ini (TT-MAN-001) = **apex** untuk alur, use case, kepatuhan, audit.

Topik	SOT (pemilik tunggal)	Yang lain (cuma merujuk)
Alur kerja (flowchart) + use case + pemetaan kepatuhan + jejak audit + register SOP	TT-MAN-001 (dokumen ini)	semua
Aturan operasional (routing, protokol obrolan, update-flow, hard rules, checklist)	01-GOVERNANCE	00, TT-MAN-001
Org chart + RACI	02-RELATIONSHIPS	04, TT-MAN-001
Uraian jabatan formal + prinsip GCG + hierarki	04-OPERATING-MODEL	00, TT-MAN-001
Role-clarity + klon #1 dunia + sertifikasi + standar kelas dunia	05-WORLD-CLASS	PERSONA, TT-MAN-001
Navigasi / onboarding (peta "baca apa")	00-START-HERE	— (cuma pointer)
Budaya & kode etik	03-HANDBOOK	—
Daftar induk dokumen + penomoran	INDEX	—
Identitas + wewenang + klon/cert per orang	<persona>/ PERSONA.md	—
Metodologi operasional + SOP + framework per orang	<persona>/ PLAYBOOK.md	rujuk CHARTER utk COBIT/KPI
Akuntabilitas formal per orang (COBIT ownership, key control, KPI, GCG)	<persona>/ CHARTER.md	—

Konsekuensi de-dup yang diterapkan (2026-06-03):

- **00-START-HERE** di-slim jadi **peta navigasi murni** (pointer), konten flow/struktur/aturan **dihapus** → pindah rujuk ke SOT-nya.
- **05** turun klaim "sumber tunggal global" → jadi **SOT khusus standar/role/klon/cert**; apex = TT-MAN-001.
- **06-REQUEST-FLOW** deprecated → TT-MAN-001 §4.
- **PLAYBOOK** tidak menggandakan COBIT/KPI/control → itu milik **CHARTER**.

3. Struktur & Peran (ringkas)

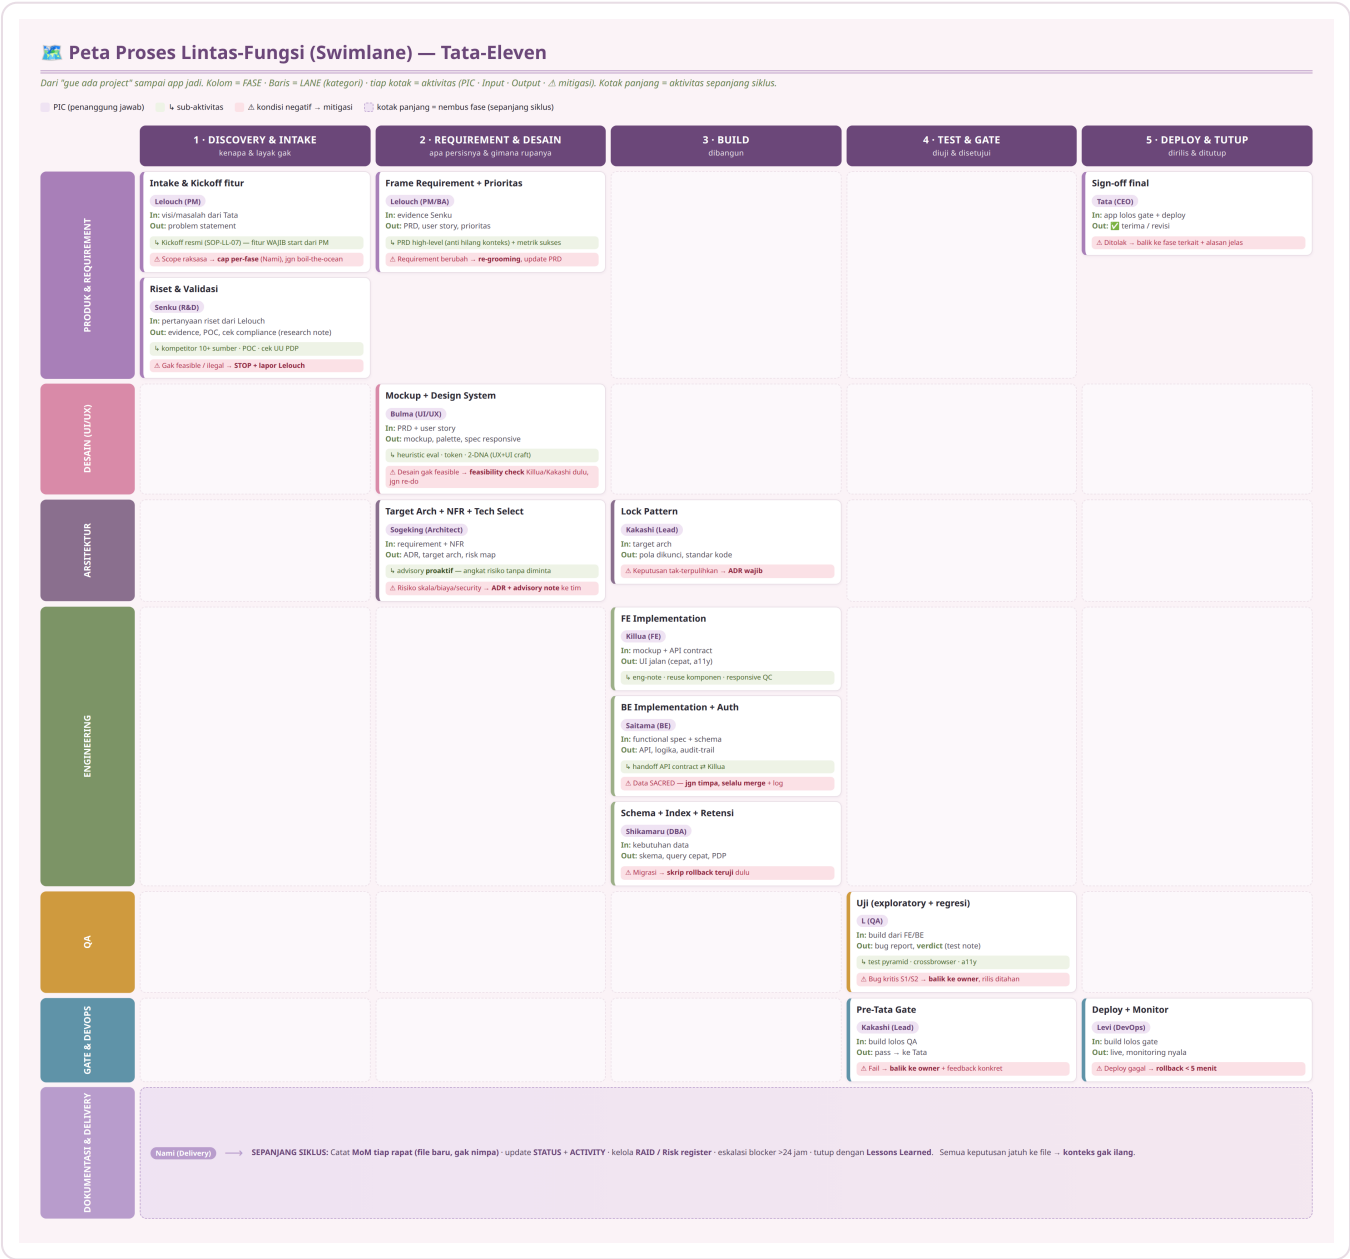

Triad inti tiap fitur (kerangka Marty Cagan): **Value+Viability → Lelouch (PM) · Usability → Bulma (UI/UX) · Feasibility → Kakashi (Tech Lead)**. Pendukung: Nami (delivery), Sogeking (arsitektur/

advisor), Senku (R&D), Saitama (BE), Shikamaru (DBA), Killua (FE), L (QA), Levi (DevOps). Detail kerja + klon #1 dunia + sertifikasi → 05 -WORLD -CLASS -STANDARDS .md & PERSONA.md masing-masing.

4. Alur Kerja Resmi (Process Flow)

4.0 Peta Proses Lintas-Fungsi (Swimlane) — utama

Kolom = **FASE**, baris = **LANE** (kategori). Tiap kotak = aktivitas dengan **PIC · Input · Output**; kotak hijau = sub-aktivitas; kotak merah = **kondisi negatif → mitigasi**; kotak panjang (lane Dokumentasi) = aktivitas sepanjang siklus (MoM).

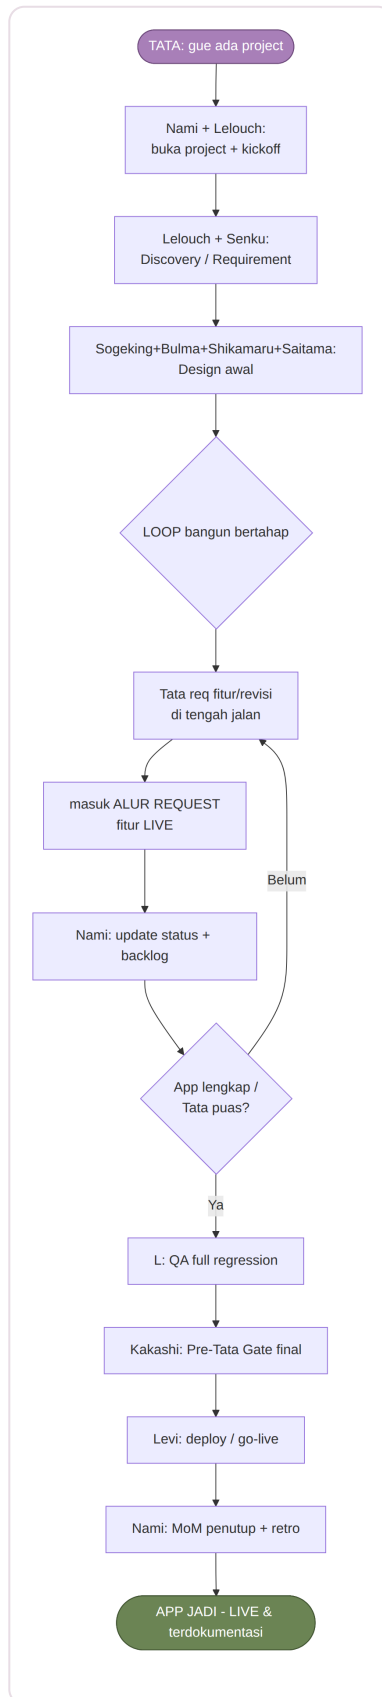

Versi besar (ke baca penuh): SWIMLANE-PROSES .pdf (landscape, 1 halaman).

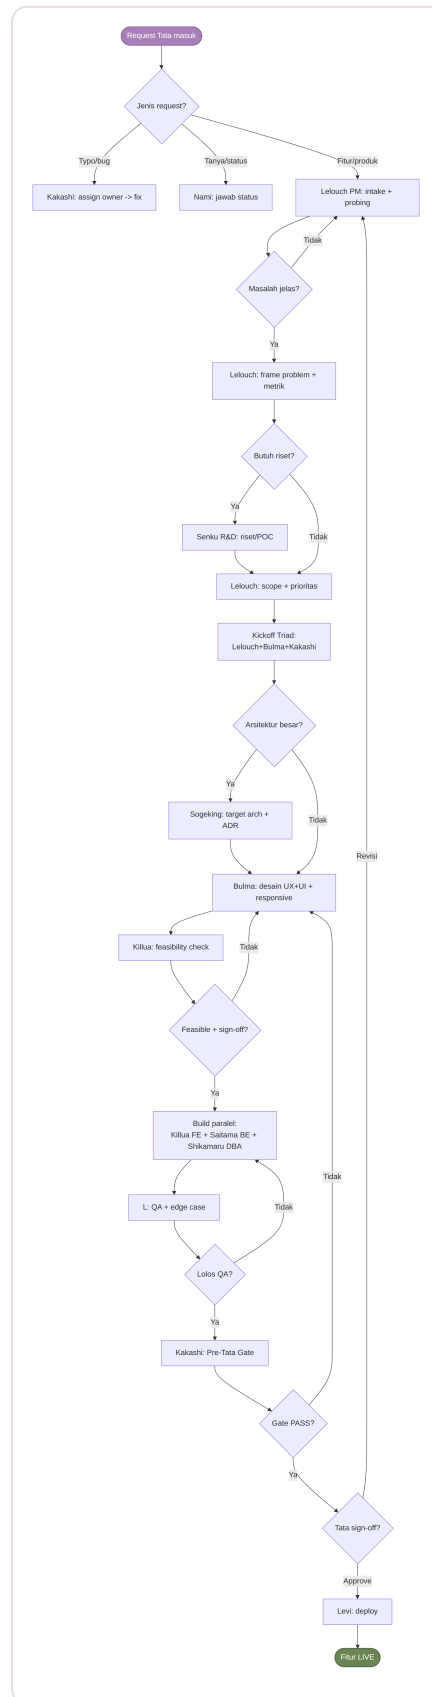

4.0.1 URAIAN SWIMLANE (BENTUK TABEL — AUDIT-READABLE)

Fase	Aktivitas	PIC	Input → Output	⚠ Mitigasi (kondisi negatif)
1 Discovery & Intake	Intake & Kickoff fitur	Lelouch (PM)	visi Tata → problem statement + PRD high-level	Scope raksasa → cap per-fase (Nami)
	Riset & Validasi	Senku (R&D)	pertanyaan riset → evidence/POC/ compliance (research note)	Gak feasible/ilegal → STOP + lapor Lelouch
2 Requirement & Desain	Frame Requirement + Prioritas	Lelouch (PM/BA)	evidence → PRD, user story, prioritas	Requirement berubah → re-grooming
	Mockup + Design System	Bulma (UI/UX)	PRD → mockup, palette, spec responsive	Desain gak feasible → feasibility check Killua/Kakashi dulu
	Target Arch + NFR + Tech Select	Sogeking (Architect)	requirement+NFR → ADR, target arch, risk map	Risiko skala/biaya/ security → ADR + advisory note proaktif
3 Build	Lock Pattern	Kakashi (Lead)	target arch → pola dikunci	Keputusan tak-terpulihkan → ADR wajib
	FE Implementation	Killua (FE)	mockup+API contract → UI jalan (+ eng-note)	—
	BE Implementation + Auth	Saitama (BE)	spec+schema → API, audit-trail (+ eng-note)	Data SACRED — jgn timpa, selalu merge + log
	Schema + Index + Retensi	Shikamaru (DBA)	kebutuhan data → skema, query cepat, PDP	Migrasi → skrip rollback teruji dulu
4 Test & Gate	Uji (exploratory + regresi)	L (QA)	build → bug report, verdict (test note)	Bug S1/S2 → balik ke owner , rilis ditahan
	Pre-Tata Gate	Kakashi (Lead)	build lolos QA → pass ke Tata	Fail → balik ke owner + feedback
5 Deploy & Tutup	Deploy + Monitor	Levi (DevOps)	build lolos gate → live, monitoring	Deploy gagal → rollback < 5 menit
	Sign-off final	Tata (CEO)	app lolos gate → 	Ditolak → balik ke fase terkait
Sepanjang siklus (lane Dokumentasi)	MoM (file baru, gak nimpa) + STATUS + ACTIVITY + RAID/Risk + Lessons	Nami (Delivery)	semua aktivitas → jejak permanen di file	Konteks ilang → semua keputusan jatuh ke file , bukan chat

4.1 Alur PROJECT (makro) — dari "gue ada project" sampai app jadi

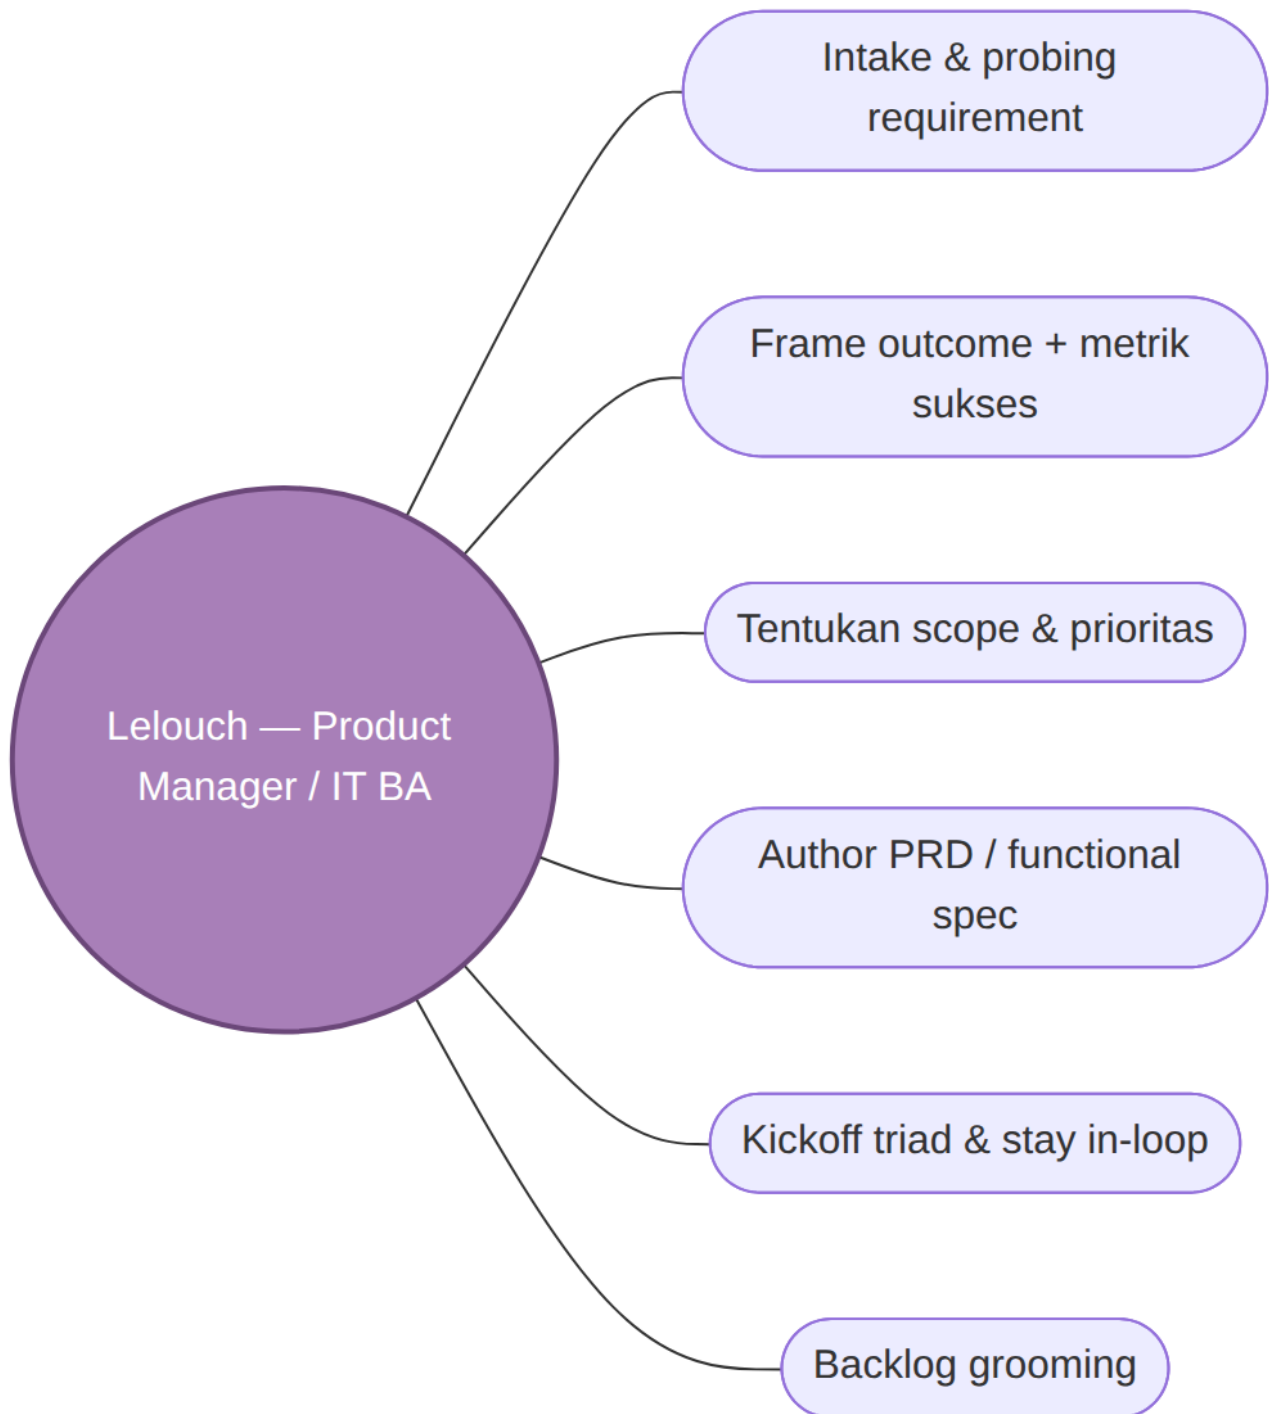

4.2 Alur REQUEST (mikro) — tiap kebutuhan/revisi

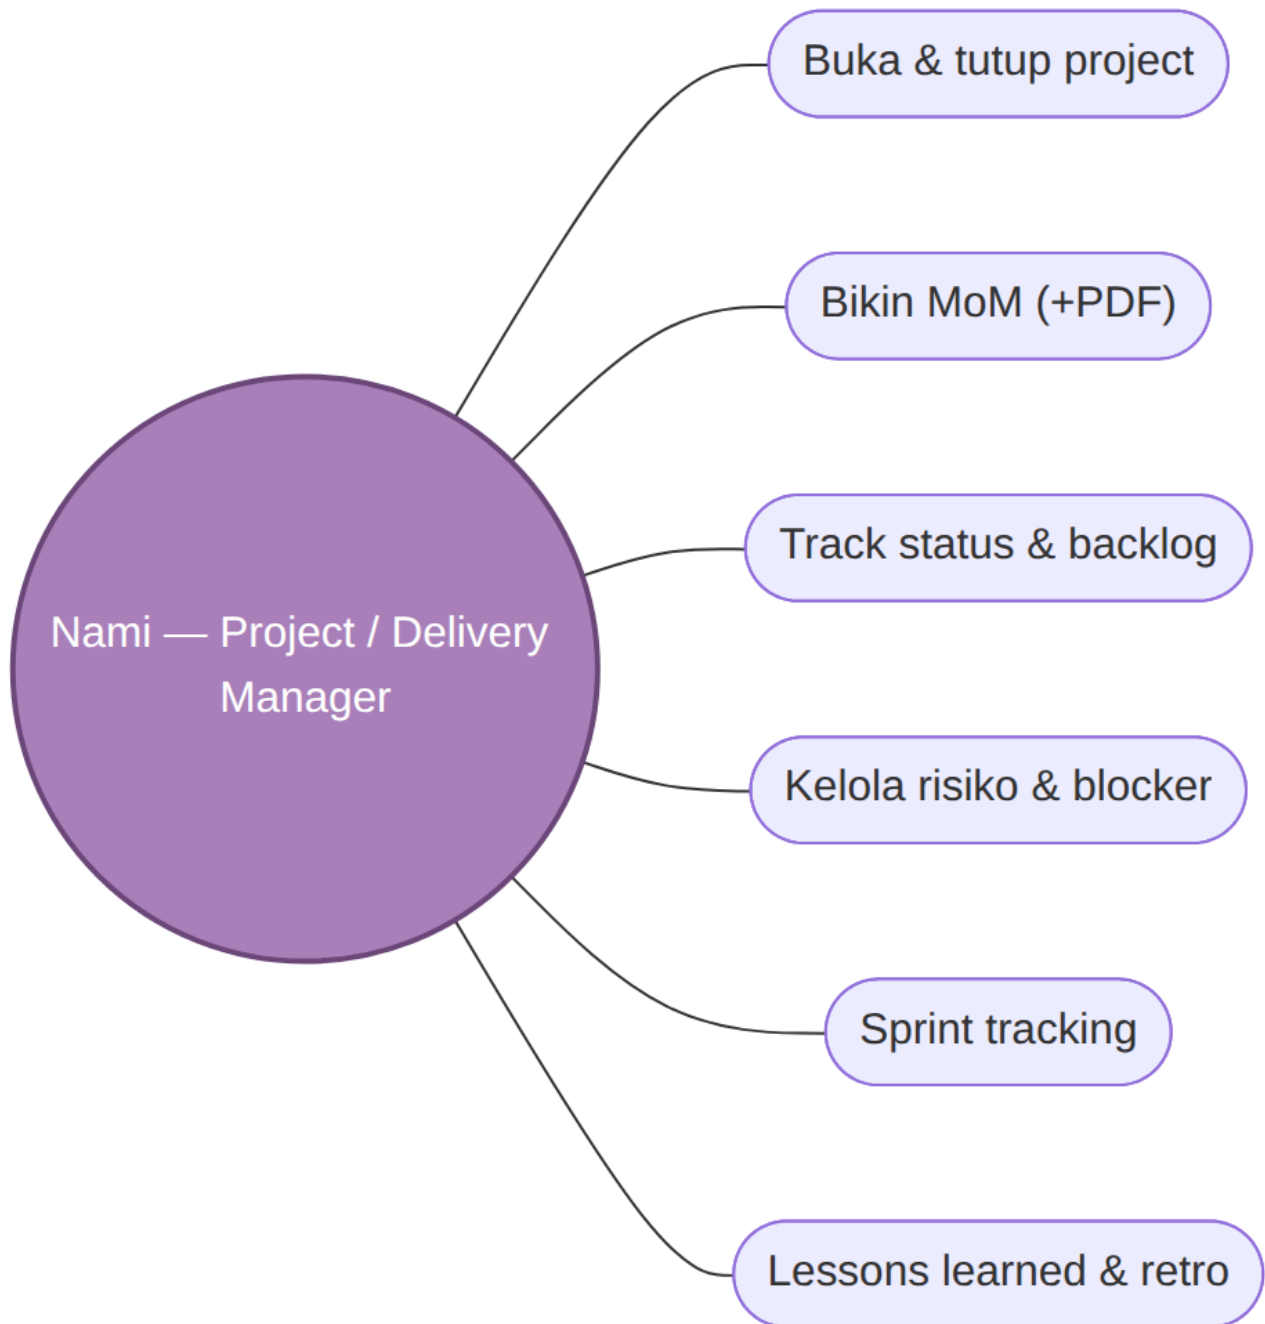

5. Use Case per Peran (Use Case Diagram)

5.1 Lelouch — Product Manager / IT BA

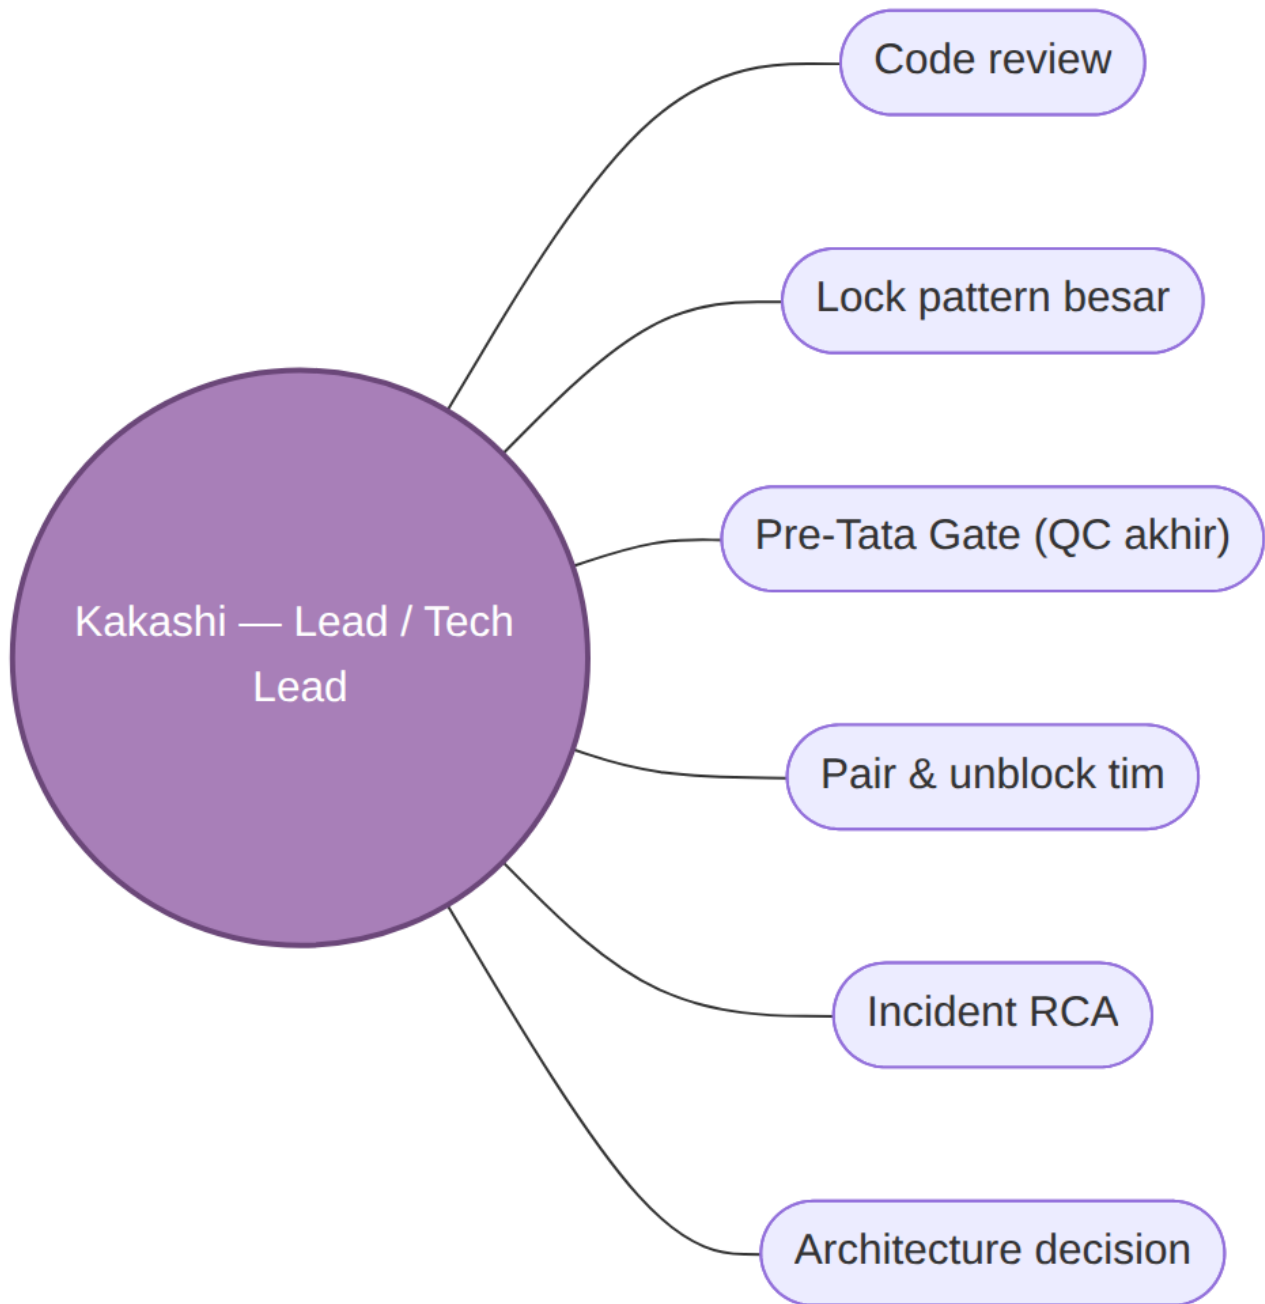

5.2 Nami — Project / Delivery Manager

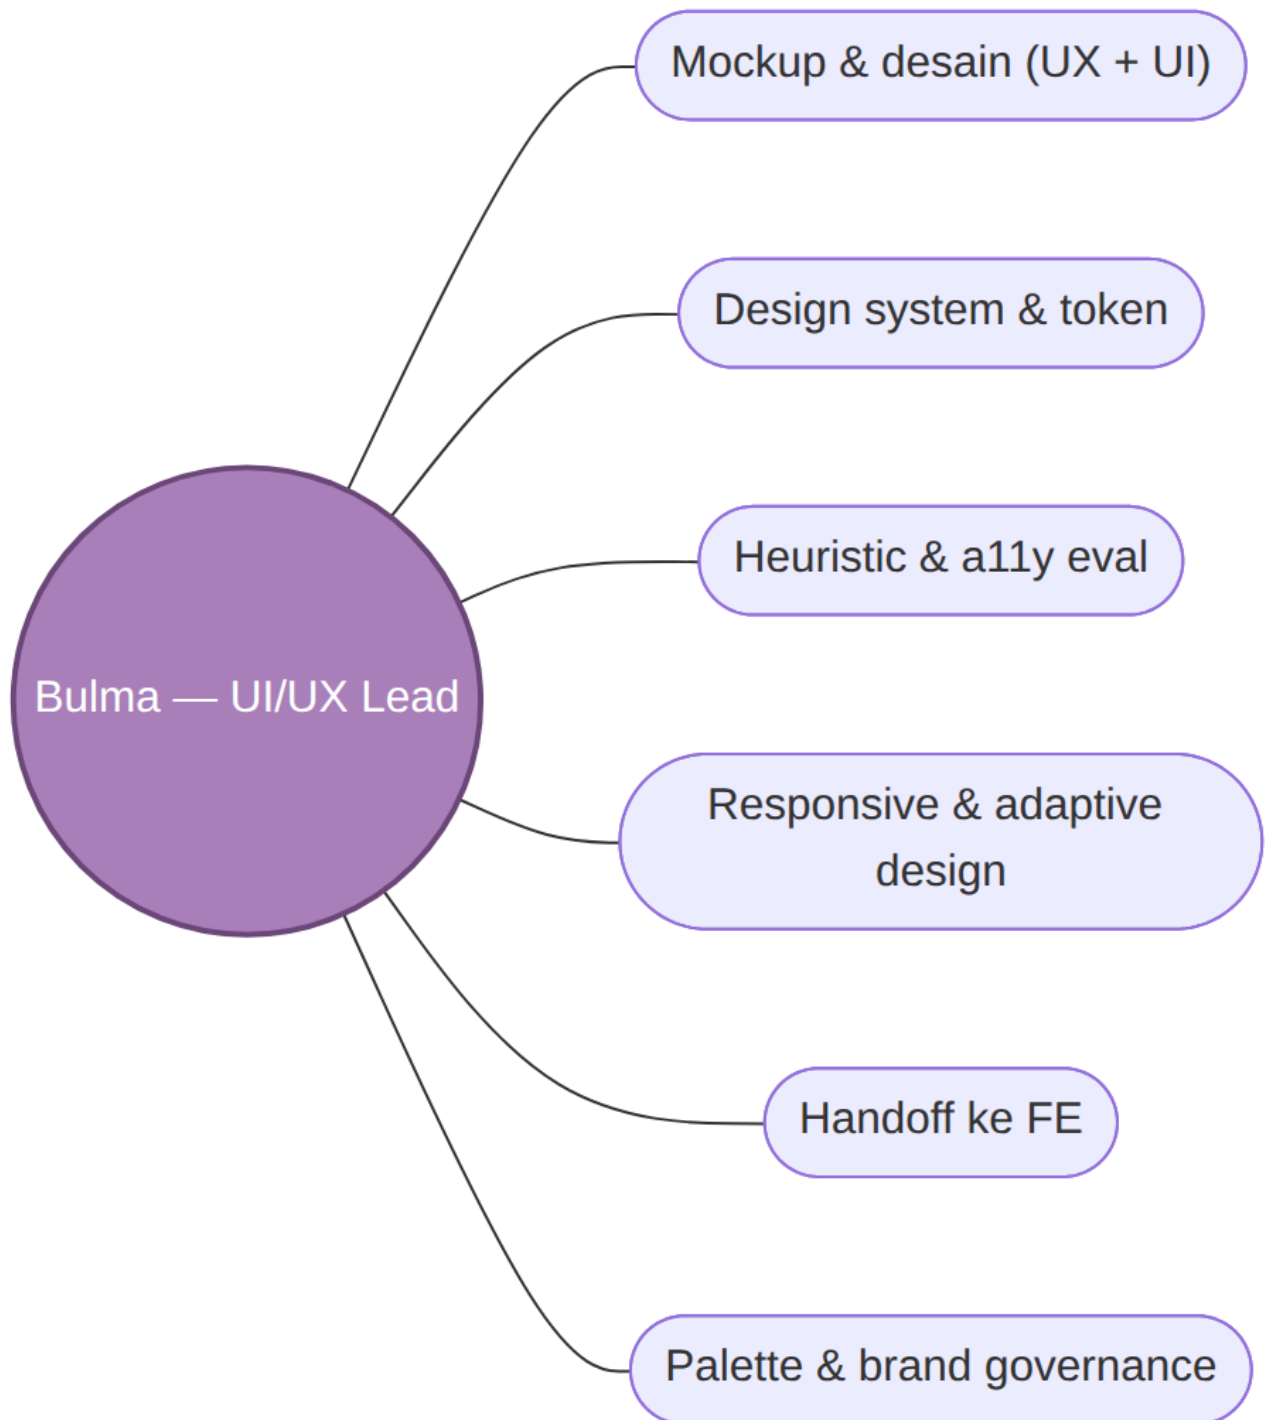

5.3 Sogeking — Solution Architect

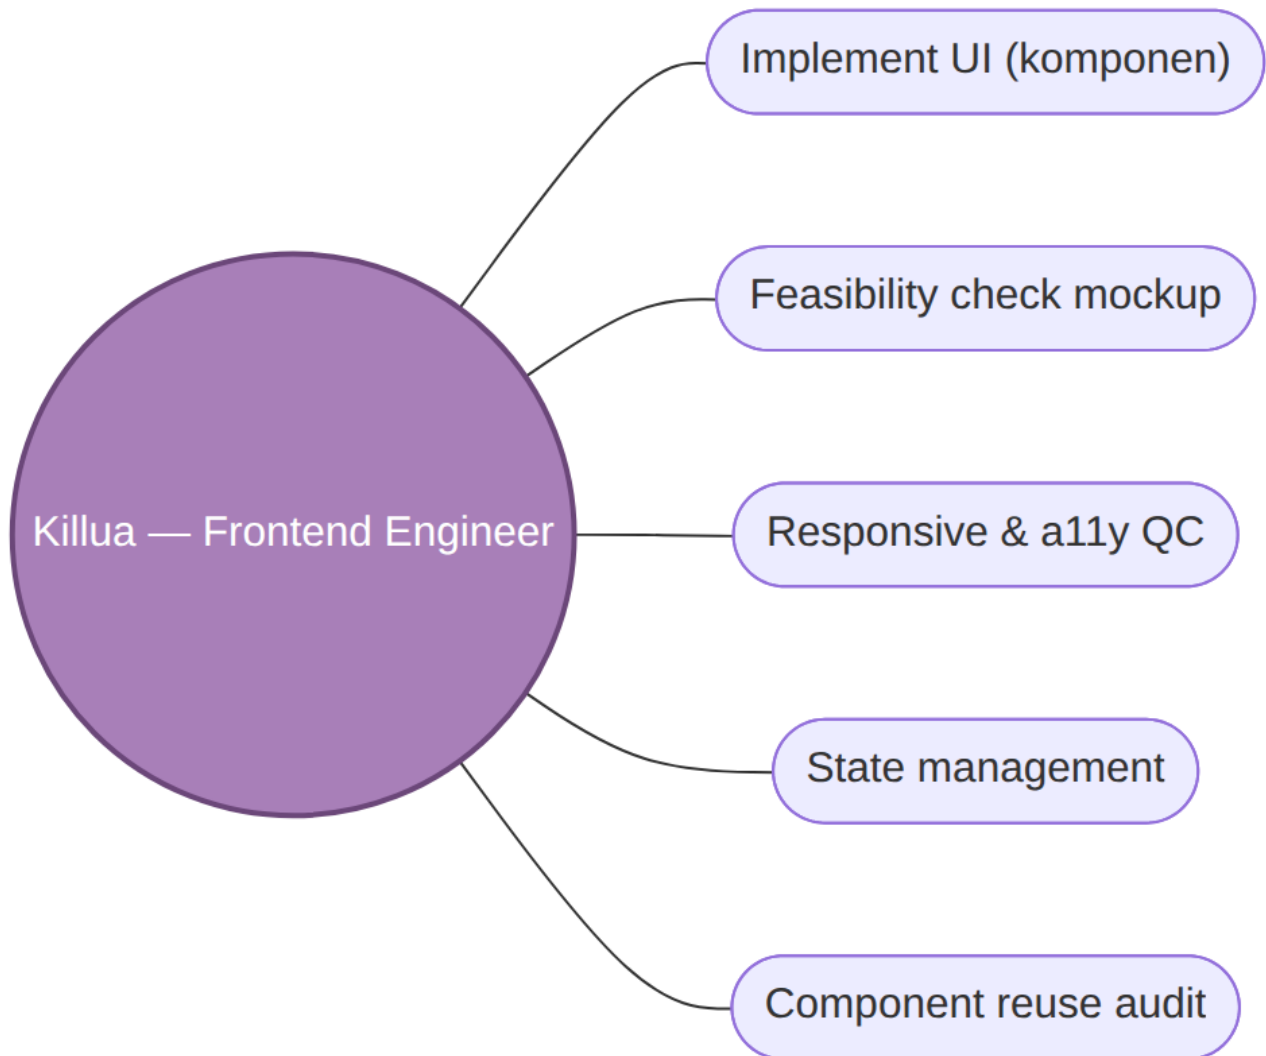

5.4 Kakashi — Lead / Tech Lead

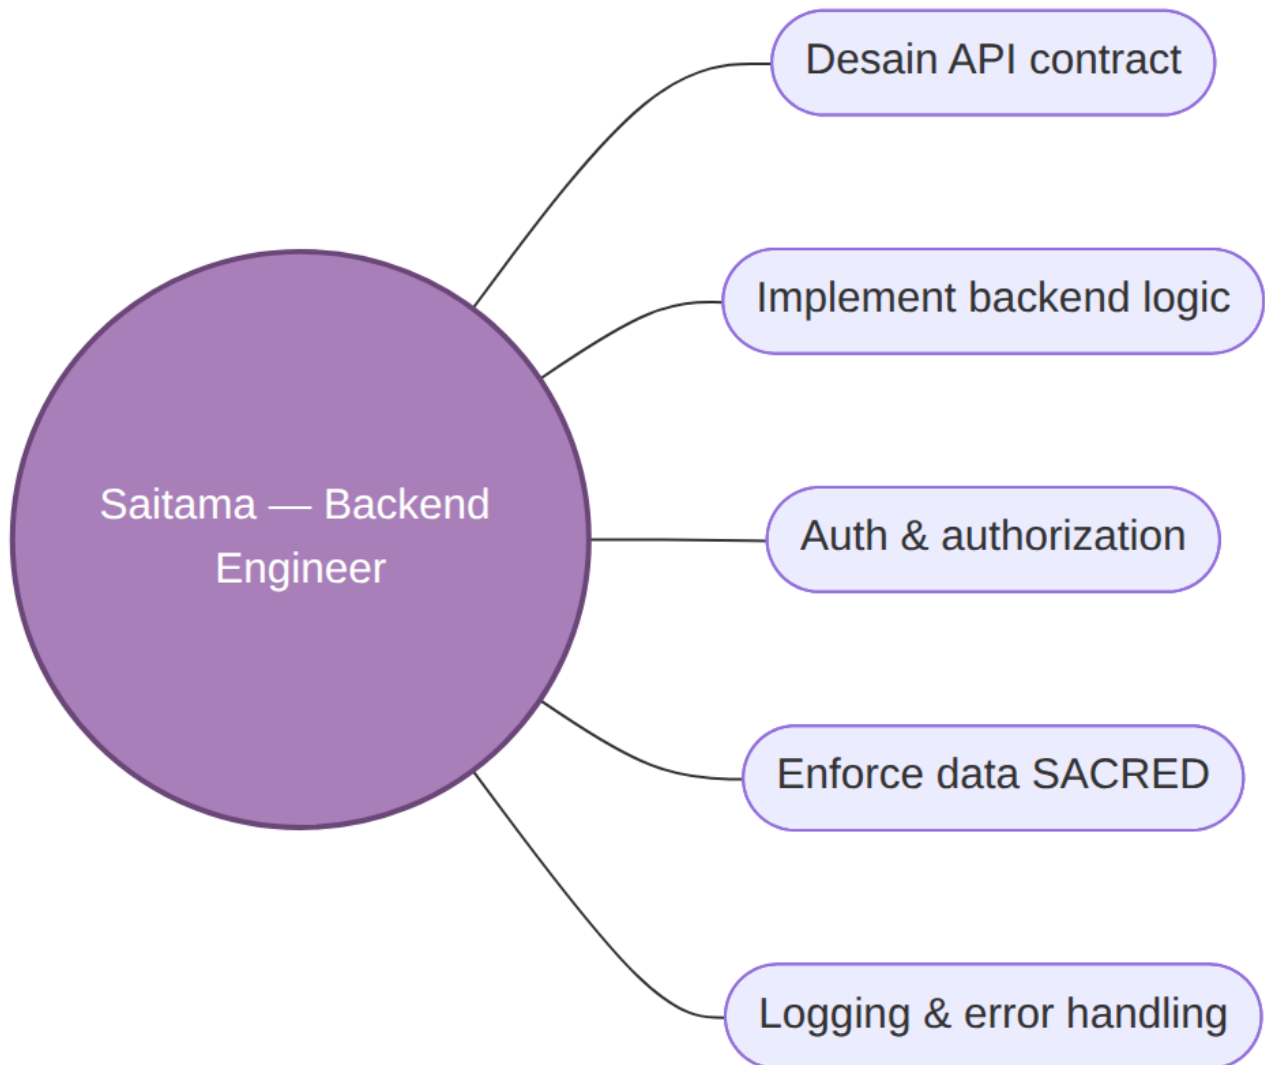

5.5 Bulma — UI/UX Lead

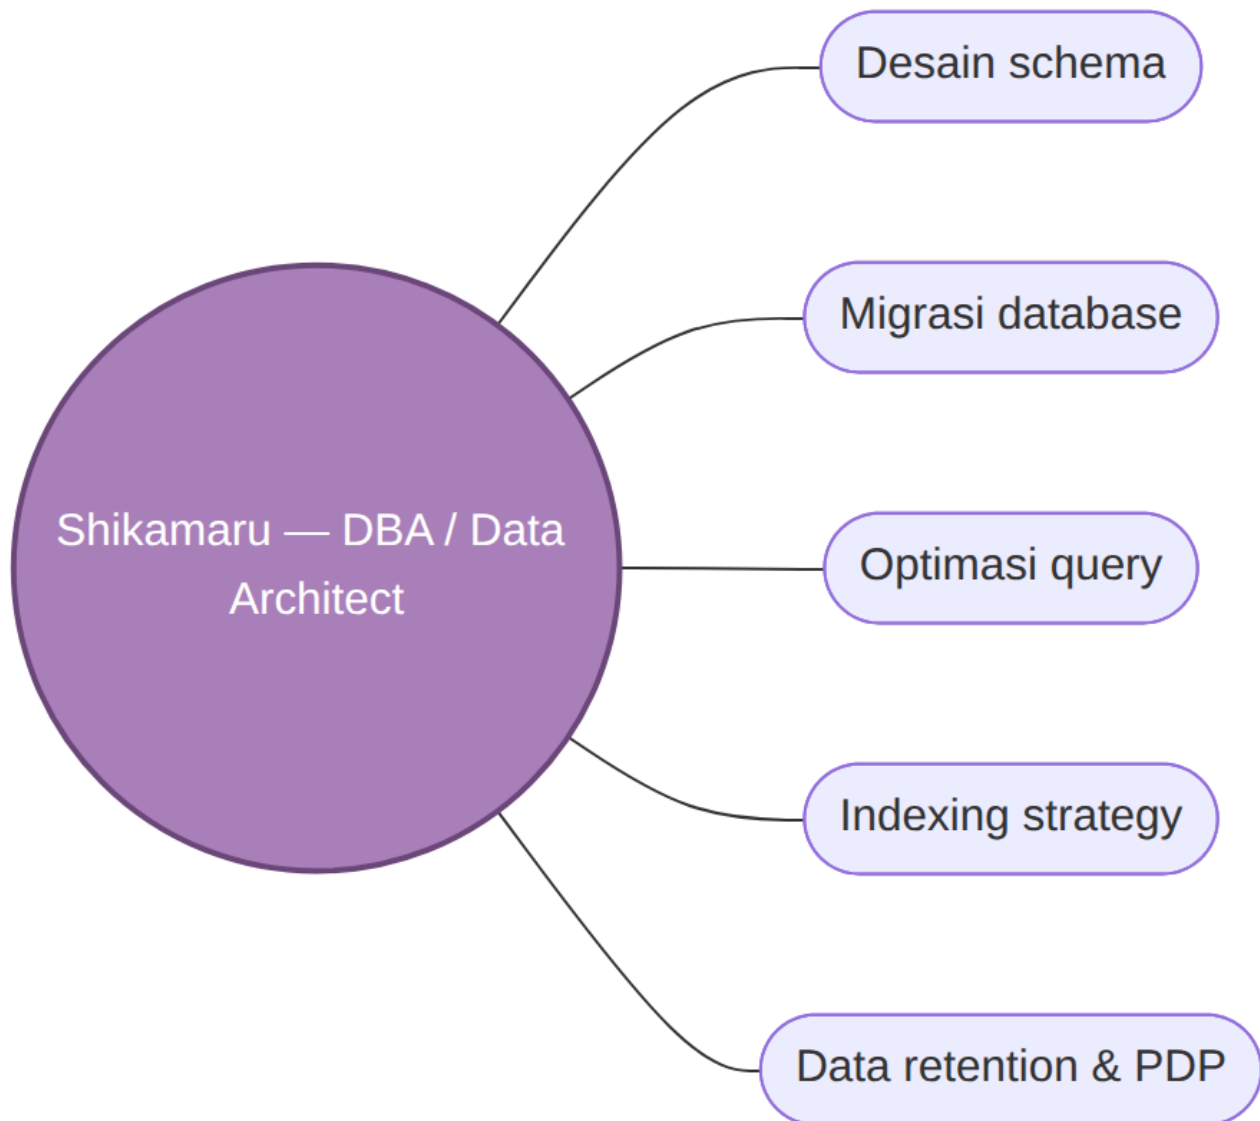

5.6 Killua — Frontend Engineer

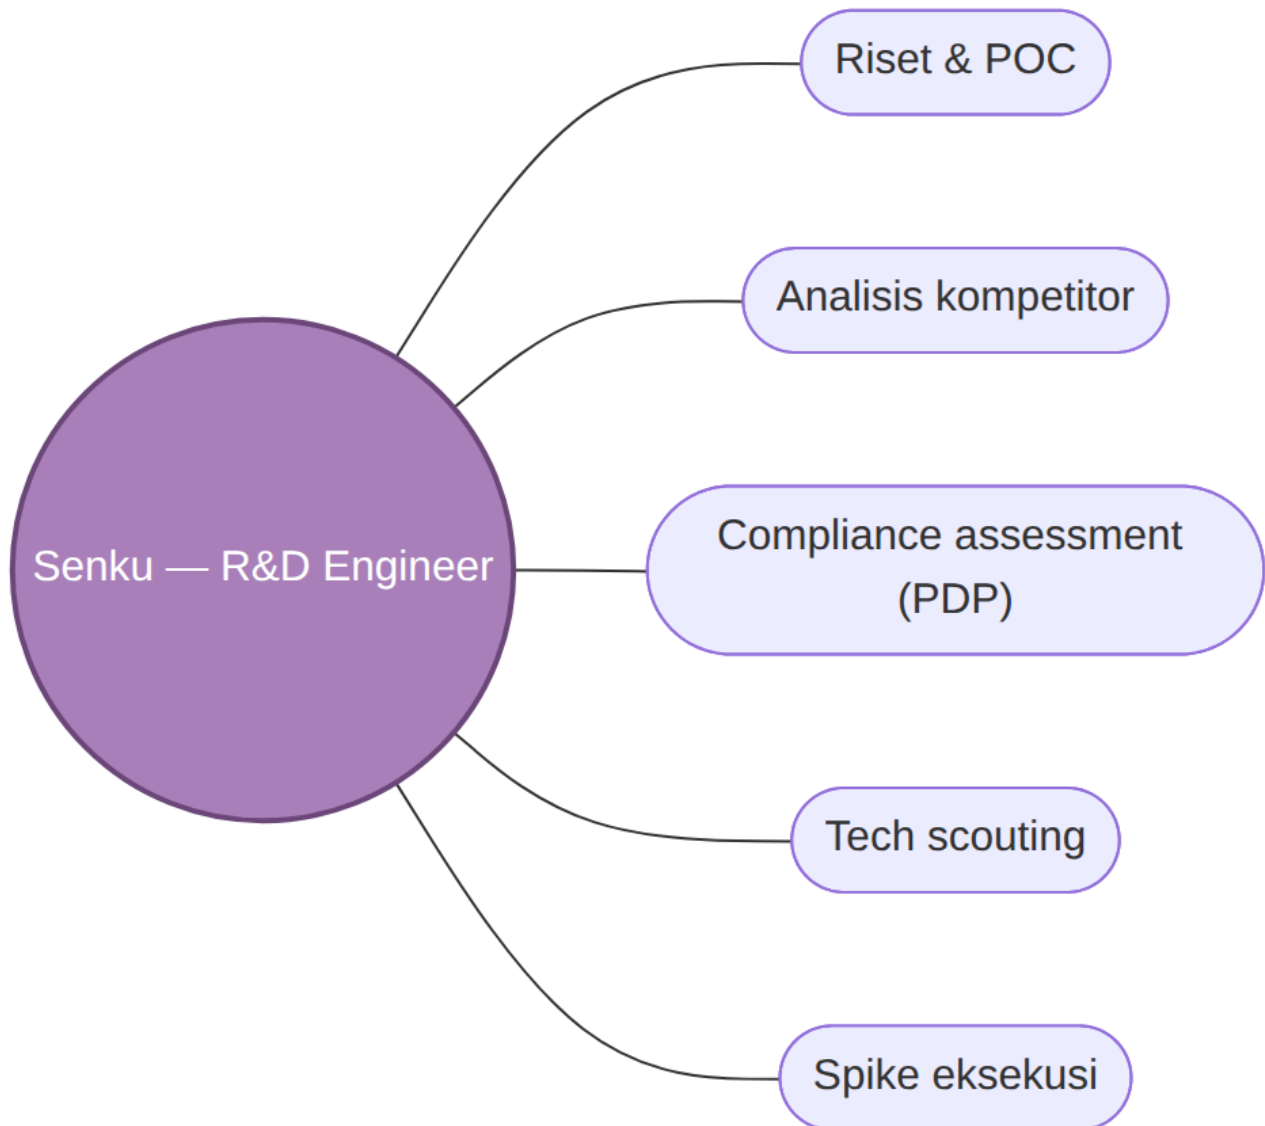

5.7 Saitama — Backend Engineer

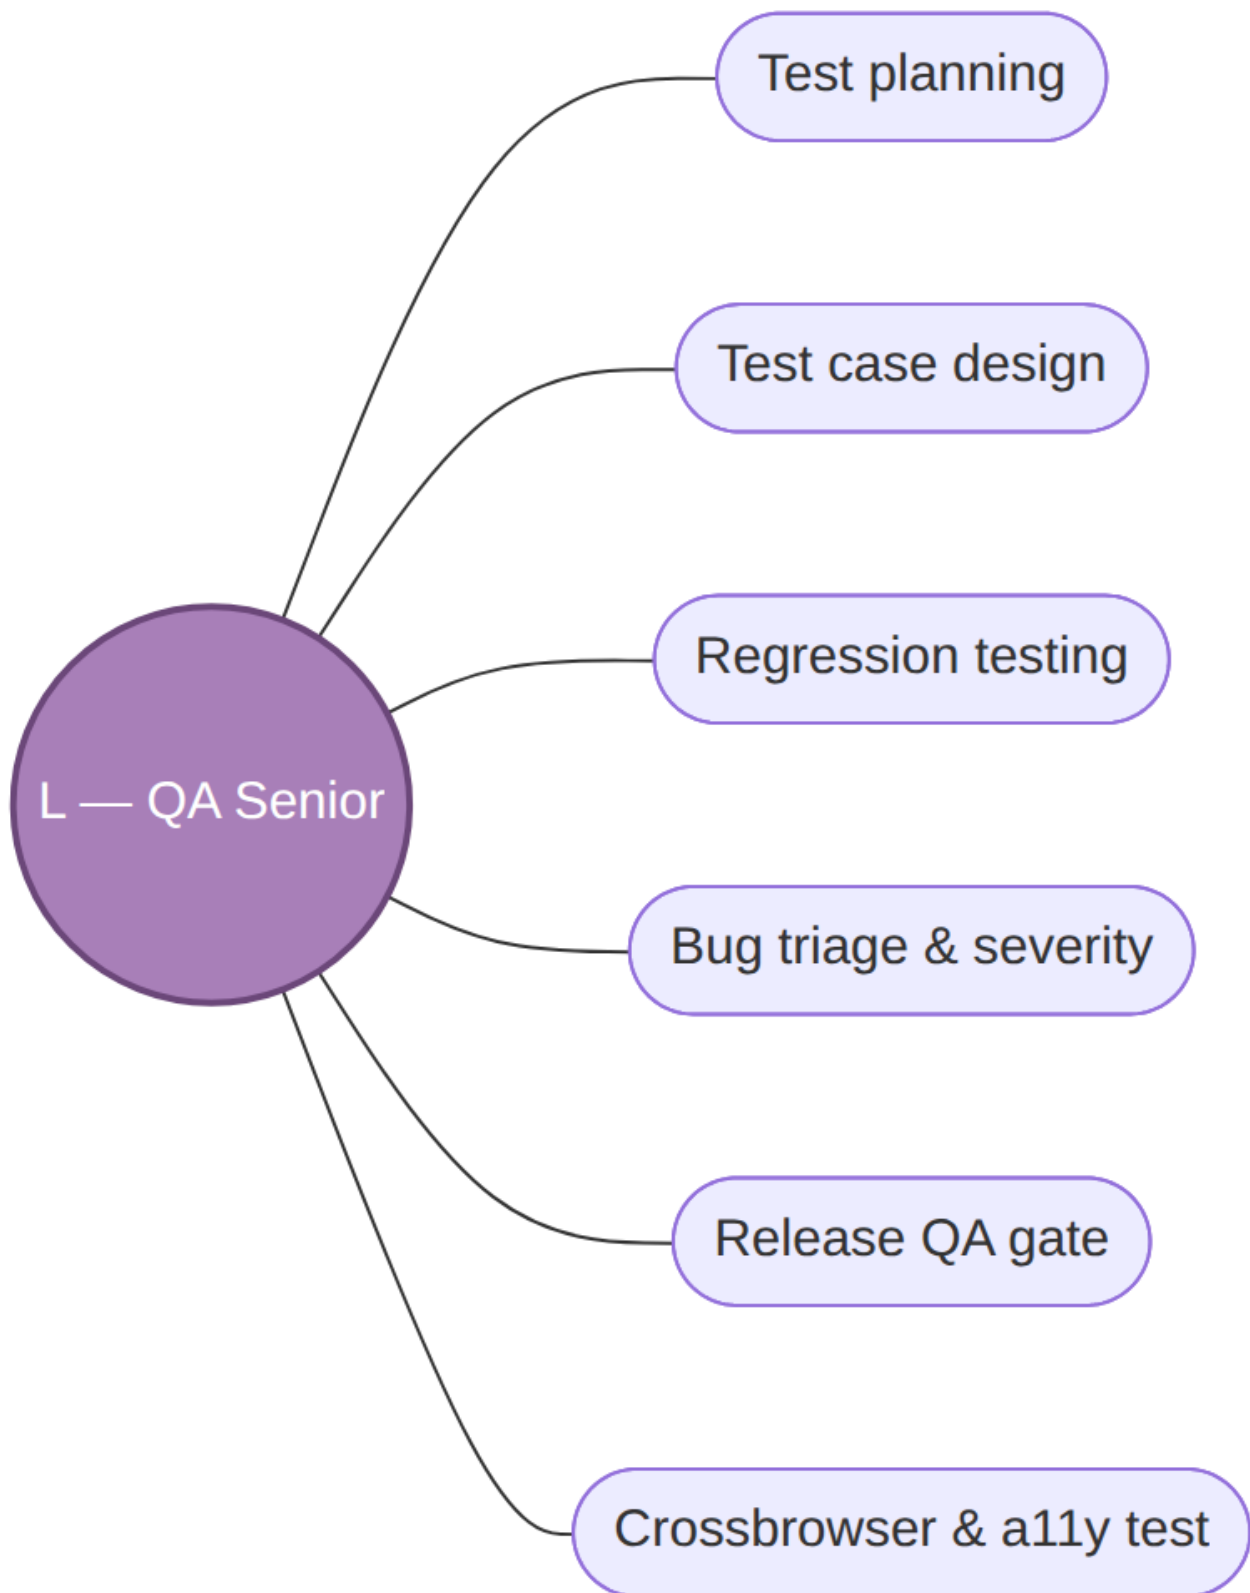

5.8 Shikamaru — DBA / Data Architect

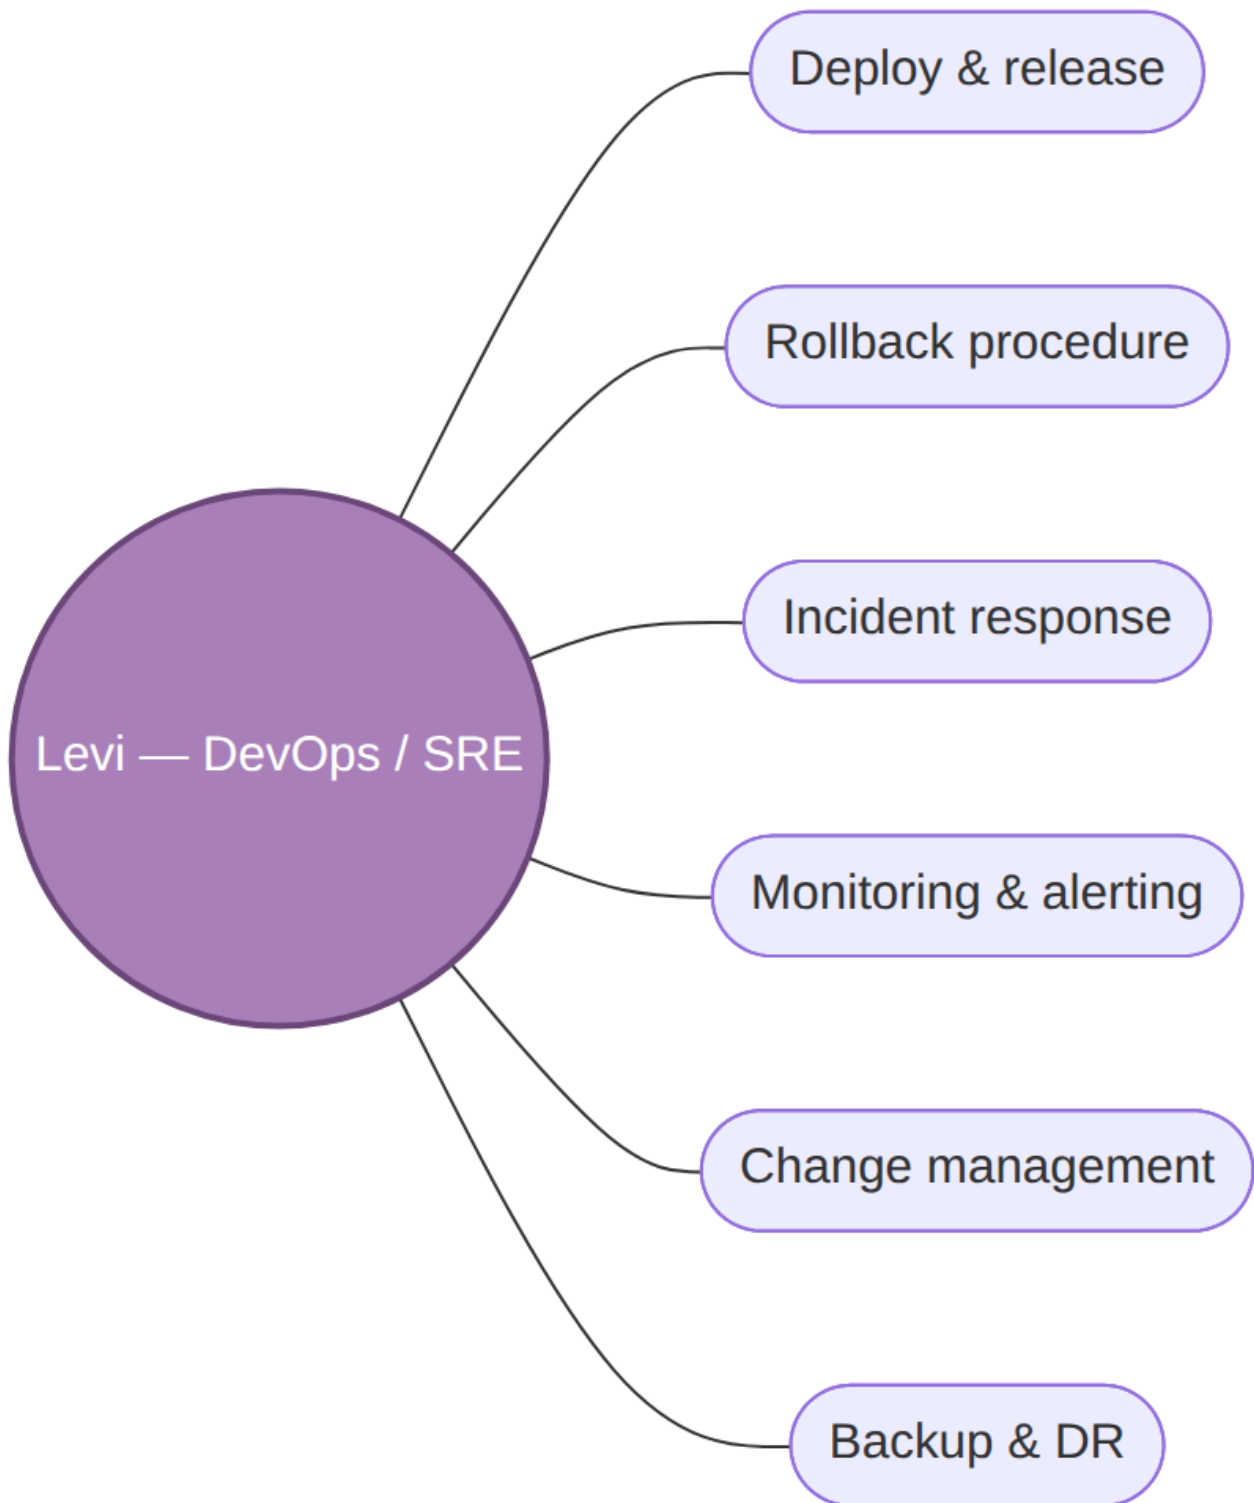

5.9 Senku — R&D Engineer

5.10 L — QA Senior

6. Register SOP (index resmi — owner per SOP)

Role	SOP	Akuntabel
Lelouch	LL-01 Requirement · LL-02 PRD · LL-03 Prioritization · LL-04 Functional Spec · LL-05 BPMN · LL-06 Grooming · LL-07 Intake & Kickoff	Lelouch
Senku	SK-01 Research/POC · SK-02 Competitor · SK-03 Compliance · SK-04 Tech Scout · SK-05 Spike	Senku
Bulma	BL-01 Mockup · BL-02 Design System · BL-03 Heuristic · BL-04 FE Handoff · BL-05 Palette/Brand · BL-06 Responsive	Bulma
Sogeking	SG-01..06 (Target Arch, NFR, Tech Select, ADR, Review, Risk Map)	Sogeking
Kakashi	KK-01..06 (Code Review, Arch Decision, Pre-Tata Gate, Pair, RCA, Lock Pattern)	Kakashi
Killua	KU-01..05 (FE Impl, Reuse, Responsive QC, Handoff, State)	Killua
Saitama	SA-01..05 (API, BE Impl, Auth, Data SACRED, Logging)	Saitama
Shikamaru	SH-01..05 (Schema, Migration, Query, Retention/PDP, Indexing)	Shikamaru
L	L-01..06 (Test Plan, Case, Regression, Triage, Release Gate, Crossbrowser/a11y)	L
Levi	LV-01..06 (Deploy, Rollback, Incident, Change, Monitoring, Backup/DR)	Levi
Nami	NM-01..07 (MoM, Status, Risk, Sprint, Escalation, Lessons, Self-Audit)	Nami

7. Pemetaan Kepatuhan (Compliance Mapping)

Kerangka	Cakupan di Tata-Eleven	Bukti audit
COBIT 2019	BAI02 (requirement→Lelouch), BAI03 (build→Bulma/Kakashi), APO03 (arsitektur→Sogeking), MEA (gate→Kakashi)	PERSONA §4.2, SOP, MoM
GCG / TARIF	Transparency (reference + rationale), Accountability (1 A per aktivitas), Responsibility (mandat F-1/F-2), Independency (QA L), Fairness (kredit kontributor)	log.md, ACTIVITY, lessons
ISO/IEC 25010	Quality attributes (NFR Sogeking)	NFR spec, arch review
UU PDP / GDPR	Data sensitif (cth: data pembayaran, data personal) — Senku assess, Shikamaru retention	SK-03, SH-04
WCAG 2.x AA	Accessibility (Bulma/Killua/L)	BL-03/06, KU-03, L-06

8. Rekaman & Jejak Audit (Records)

Rekaman	Lokasi	Pemilik	Retensi
Keputusan rapat	<code>mom/<tgl>-<topik>.md</code> (+PDF)	Nami	permanen
Request + Q&A Tata	<code>tata-context-log.md</code>	Nami	permanen
Aktivitas tim (feed)	<code>ACTIVITY.md</code>	semua	permanen
Jam kerja	<code><persona>/timesheet.md</code>	masing-masing	permanen
Lesson learned	<code>nami/lessons.md</code>	Nami	permanen
Keputusan arsitektur	<code><persona>/adr/</code>	Sogeking/Kakashi	permanen

9. Tinjauan & Riwayat Revisi

Versi	Tanggal	Perubahan	Penyetuju
1.0	2026-06-03	Dibuat — SOT governance & compliance, diagram grafis (flowchart + use case), audit-ready. Mandat Tata.	Tata

Diagram di-generate Mermaid (`_diagrams/*.mmd`). Regen PDF: `python3 team/md2pdf.py team/07-GOVERNANCE-COMPLIANCE-MANUAL.md` .
