

Tool: Pre-Tata Gate Checklist

Apa: daftar periksa lintas-disiplin — gabungan QC tiap persona — yang Kakashi jalanin **sebelum artifact apapun nyampe Tata. Kapan dipake:** tiap persona handoff deliverable buat Tata consume. **Framework:** COBIT BAI07 (Change Acceptance) + MEA02 (Internal Control), ITIL Change Enablement. **Aturan:** Pass → forward ke Tata. Fail → balik ke owner + feedback konkret. **Bocor jelek = Kakashi yang salah.**

Per-type checklist

PRD (Lelouch): problem statement (bukan solusi) · hipotesis falsifiable · success metric (leading+lagging+counter) · scope TRUE MVP + non-goal · AskUserQuestion probe done · feasibility co-sign · open question surfaced

Mockup (Bulma): ≥5 reference URL · palette Tata (mauve/sage/cream, **0 coklat**) · typography ≤2 family · hierarchy clear · WCAG AA · responsive ≥2 breakpoint · microcopy boomer-proof · hero bukan stock · no lorem · empty/error/loading state

FE (Killua): reuse audit · stack lock (React+Chakra **v2**+Zustand+Fauxbase) · TS strict no `any` · no `console.log` · match mockup · responsive screenshot 375+1280 · a11y baseline · **screenshot evidence**

BE (Saitama): API contract documented · auth+role · input validation schema · no SQL concat · **no hard delete** (Data SACRED) · **no overwrite tanpa audit** · idempotent · structured log (req+user id) · error code table · test pass

Schema (Shikamaru): 3NF (denorm justified) · FK+UNIQUE+CHECK · **soft delete** `deleted_at` · audit columns · migration reversible (DOWN tested) · EXPLAIN ANALYZE critical query · index per pattern

Test report (L): smoke+functional+edge+negative · cross-browser · a11y ≥90 · severity per matrix · S1/S2 fixed · screenshot per browser

Deploy (Levi): pre-flight filled · migration tested staging · rollback < 5min tested · monitor+alert · sign-off L+Kakashi · **bukan Jumat sore** kecuali critical

MoM/Status (Nami): action triple (action+owner+due) · decision + rationale · status color jujur · risk surfaced · ask Tata explicit

Universal check (semua deliverable)

- [] **Mandate Tata** — F-1, F-2, Data SACRED, Reuse>Rebuild, no tambal-sulam, no silent auto-everything

- [] **Evidence first** — link output/screenshot/log/test
- [] **Bold key point** (Tata scanner)
- [] **Anti-jargon** kalau audience non-IT
- [] **Anti-defensive** — known limitation di-surface awal
- [] **Visible/user-facing?** → ini 🟡, butuh sign-off Tata (bukan cuma gate teknis)

CONTOH TERISI

Gate: Landing v4 (Killua re-impl, 2026-05-27)

Type: FE + Mockup gabungan

- ✓ Reuse audit (4 mod + 1 new MotionSection, justified)
 - ✓ Stack lock (Chakra v2, Fauxbase) — no violation
 - ✓ Screenshot desktop + mobile attached
 - ✓ Stats sekarang verifiable (FIX dari v3 — fake stats = evidence-first violation)
 - ✓ WhatsApp prominence, framer-motion fade-up, FAQ refined, CTA anchor
 - ✓ Bold key point, boomer-proof copy
- VERDICT: PASS. Forward @tata. (Visible → Tata final sign-off go-live.)

Tercatat di log Kakashi + ACTIVITY. Audit record kontrol KK-C1.
