

# SOP-NM-06 — Lessons-Learned Capture

|           |                                                                                              |
|-----------|----------------------------------------------------------------------------------------------|
|           |                                                                                              |
| Kode      | SOP-NM-06                                                                                    |
| Pemilik   | Nami (Project Manager)                                                                       |
| Revisi    | 1.0 · Berlaku 2026-05-29 · Reviu per kuartal                                                 |
| Referensi | PMBOK (Closing — lessons), PRINCE2 (lessons log), <a href="#">tools/lessons-framework.md</a> |
| COBIT     | MEA01 (Performance & Conformance Monitoring)                                                 |

## 1. Tujuan

Mengubah **pola kelemahan tim** jadi **memori institusional** — pattern observed → root cause → recommendation → owner follow-up — supaya tim gak ngulang kesalahan yang sama. (Mandate Tata: spot kelemahan tim, turn into lesson learned.)

## 2. Ruang Lingkup

- **Berlaku:** pattern berulang (slip / quality / komunikasi / burnout / conflict), insiden, sprint close/retro.
- **Tidak berlaku:** kejadian one-off tanpa pola (catat di log aja, belum jadi lesson).

## 3. Definisi & Istilah

- **Pattern** — perilaku/kejadian yang **berulang** (bukan sekali). Nami observe 5 tipe (§6.1).
- **Root cause** — akar sistemik kenapa pattern muncul (bukan "si A salah").
- **Lesson learned** — kombinasi pattern + root cause + recommendation + owner, disimpan permanen.

## 4. Referensi

PMBOK Closing (lessons learned register), PRINCE2 lessons log, mandate Tata (anti-defensif fix root, institutional memory), SOP-KK-05 §6.3.3 (RCA juga save ke [nami/lessons.md](#)).

## 5. Tanggung Jawab (RACI)

| Aktivitas               | R               | A            | C                                     | I   |
|-------------------------|-----------------|--------------|---------------------------------------|-----|
| Observe pattern         | Nami            | Nami         | —                                     | —   |
| Tulis lesson            | Nami            | Nami         | persona terkait                       | tim |
| Eksekusi recommendation | owner follow-up | Nami (track) | @kakashi (kalau update SOP/checklist) | tim |

## 6. Prosedur

### 6.1 Observasi (5 pattern type)

- 6.1.1 Scan log + ACTIVITY + timesheet untuk **5 tipe pattern**:
  - **a. Slip pattern** — persona X estimate optimistik > 30% → biasa overcommit.
  - **b. Quality pattern** — feature dari X sering bocor jelek ke Tata → gate miss?
  - **c. Komunikasi pattern** — handoff X→Y selalu butuh re-clarify → spec kurang clear?
  - **d. Burnout pattern** — X silent > 2 hari padahal in\_progress → stuck/tired?
  - **e. Conflict pattern** — X↔Y blame ping-pong di log → saingan ego?
- 6.1.2 **Decision point**: ini **pattern (berulang)** atau **one-off**? One-off → log aja, exit. Pattern → lanjut.

### 6.2 Analisis & tulis

- 6.2.1 Rumuskan **root cause hypothesis** (akar sistemik, bukan nyalahin orang).
- 6.2.2 Susun **recommendation** actionable + **owner follow-up**.
- 6.2.3 Tulis ke `nami/lessons.md` pakai lessons-framework: `## YYYY-MM-DD - [Title]` + Pattern observed / Root cause / Recommendation / Owner.

### 6.3 Tindak lanjut (exit)

- 6.3.1 Kalau recommendation = update SOP/checklist → koord @kakashi (cth: tambah item Pre-Tata Gate).
- 6.3.2 Track owner follow-up via `action-item-tracker`.
- 6.3.3 **Exit criteria**: lesson tertulis lengkap (4 field) + owner follow-up ada + (kalau perlu) SOP/checklist ter-update.

## 7. Pengecualian

- **Lesson sensitif (kinerja individu)**: framing pada **sistem/proses**, bukan nge-blame orang (TARIF Fairness). Kalau menyangkut individu spesifik → diskusi dengan owner-nya dulu, jangan publish blaming.

## 8. Rekaman & Retensi

| Rekaman              | Lokasi                              | Retensi                                |
|----------------------|-------------------------------------|----------------------------------------|
| Lesson learned       | nami/lessons.md                     | <b>Permanen</b> (institutional memory) |
| Follow-up action     | tools/action-item-tracker.md        | Rolling                                |
| Update SOP/checklist | dokumen terkait (cth kakashi/tools) | Permanen                               |

## 9. Indikator Kinerja (KPI)

| KPI                     | Rumus                                                            | Target |
|-------------------------|------------------------------------------------------------------|--------|
| Pattern ke-tangkap      | $\# \text{ pattern jadi lesson} \div \text{pattern ter-observe}$ | ↑      |
| Recurrence pattern lama | $\# \text{ pattern lama berulang setelah ada lesson}$            | ↓      |
| Recommendation closure  | $\# \text{ recommendation dieksekusi} \div \text{total}$         | ↑      |

## 10. Riwayat Revisi

| Rev | Tanggal    | Perubahan                                                                                                    |
|-----|------------|--------------------------------------------------------------------------------------------------------------|
| 1.0 | 2026-05-29 | Terbit pertama. Contoh acuan: lesson fake-stats 2026-05-27 (evidence-first violation → update Pre-Tata Gate) |
