

Tool: MoM (Minutes of Meeting)

Apa: notulen rapat terstruktur — keputusan + rasional + rencana tindak (action item) + blocker + risk. **Kapan dipake:** SOP-NM-01, tiap meeting/standup/sync/decision-meeting/retro. **Aturan keras Nami:** tiap action item WAJIB **action-triple** (action + owner + due date). Keputusan WAJIB + **rationale**. **Bold** key decision + action item (Tata scanner). **Output:** simpen di `team/mom/YYYY-MM-DD-<topic>.md`. Permanen, audit record (kontrol N1).

QC sebelum distribute (jalanin semua)

- [] **Attendees listed**
- [] **Agenda items addressed**
- [] **Decisions explicit + rationale** (bold)
- [] **Action items:** action + owner + due (action-triple wajib)
- [] **Blockers documented** + severity
- [] **Next sync set** (kalau ada)
- [] **Distribution list** — tagged stakeholders relevan
- [] (Kalau ke Tata) **Pre-Tata Gate Kakashi pass**

TEMPLATE (copy mulai sini)

```
# MoM — <judul> · YYYY-MM-DD

**Date:** YYYY-MM-DD HH:MM
**Facilitator:** Nami (Project Manager)
**Type:** Stand-up / Sync / Decision meeting / Retro
**Status:** ACTIVE / LOCKED / CLOSED
**Attendees:** @tata, @lelouch, @bulma, @killua, ...
**Stakeholder:** @tata (CEO)

## TL;DR

- **<key point 1>**
- **<key point 2>**
- **<key point 3>**

## Agenda
1. ...
2. ...

## Discussion notes
### <Agenda item 1>

- ...
```

Decisions

-  ****<Decision 1>**** – rationale: ...
-  ****<Decision 2>**** – rationale: ...

Action items

#	Action	Owner	Due	Status
1	**<action>**	@persona	YYYY-MM-DD	Open

Blockers

#	Blocker	Severity	Owner	Mitigation
1	 <blocker>	High	@persona	...

Risks

CONTOH TERISI (dari proyek contoh — interactive-invitation req workshop)

MoM – Interactive Invitation: Requirement Gathering · 2026-05-28

****Date:**** 2026-05-28

****Facilitator:**** Nami (Project Manager)

****Lead:**** Lelouch (PM / IT Business Analyst)

****Type:**** Requirement gathering workshop (stakeholder = Tata)

****Status:**** Fase 1 LOCKED (8/8 component) – Fase 2 queued

****Attendees:**** @nami (MoM), @lelouch (lead), @bulma, @saitama, @shikamaru, @senku, @killua (nyimak)

****Stakeholder:**** @tata (CEO)

TL;DR

- Tata mau ****2 tipe undangan digital**** (interaktif + slide). ****Interaktif duluan****, target gaptek-
- Requirement digali ****per area, satu-satu**** – konten 8 clickable component DULU, dashboard Fase 2
- ****Fase 1 LOCKED 8/8**** + 7 cross-cutting decision tercatat.

Decisions

-  ****Probing dipecah per-fase**** – rationale: scope RAKSASA, mandate Tata "satu-satu", hindari bo
-  ****Tiap clickable component bisa on/off + editable user**** – rationale: Tata konsisten minta co
-  ****Gift registry buka tab baru**** – rationale: alur balik ke undangan tetap mulus (UX Bulma).

Action items

#	Action	Owner	Due	Status
1	**Lead probing per-component (C1 dst)**	@lelouch	2026-05-28	 Done (8/8)
2	**Catat decision tiap jawaban Tata ke MoM**	@nami	2026-05-28	 Done
3	**Jadwalkin probing Fase 2 (dashboard)**	@nami	Nunggu aba-aba Tata	Open

Risks

- ⚠️ ****Scope RAKSASA**** (8 component + dashboard + auth + 2 tipe) – mitigasi: cap per-fase, probing
- ⚠️ ****Risk hardcode field**** – mitigasi: arsitektur config-driven dari awal (lesson kandidat, watch

Next sync

Fase 2 (dashboard/settings) – async, nunggu aba-aba Tata.

*MoM ini beneran kejadian (lihat [nami/log.md](#) 2026-05-28). Tiap keputusan ada rationale, tiap action ada owner + due. Itu cara kerjanya — **MoM = memori keputusan, bukan transkrip ngalor-ngidul.***
