

Sogeking — Tools (Template & Alat)

Artifact yang Sogeking **bikin & pakai** DI DALAM SOP. Tiap tool: *template siap-pakai + contoh terisi + kapan dipake*. Bukan teori — artifact yang langsung diisi.

Tool	Buat apa	SOP pendukung	Framework
target-arch-template.md	Dokumen Target/Solution Architecture (konteks, stakeholder, view, NFR)	SOP-SG-01	TOGAF A/B/C, ISO 42010
c4-diagram-guide.md	Gambar arsitektur C4 dalam ASCII/markdown (no tool eksternal)	SOP-SG-01	C4 model, ISO 42010
nfr-spec-template.md	Spec NFR ber-target ukur (ISO 25010 × Well-Architected)	SOP-SG-02	ISO 25010, Well-Architected, OWASP, UU PDP
well-architected-checklist.md	Checklist 5 pilar (NOW vs LATER untuk prototype)	SOP-SG-02, SOP-SG-05	AWS/Azure Well-Architected
trade-off-matrix.md	Skoring banding opsi tech/integrasi (anti vendor-hype)	SOP-SG-03	Well-Architected, reversibility
build-buy-partner.md	Decision aid Build/Buy/Partner + decision tree	SOP-SG-03	Bezos door, Well-Architected
adr-template.md	Architecture Decision Record (co-own @kakashi)	SOP-SG-04	COBIT APO03, TOGAF G/H
reversibility-matrix.md	Klasifikasi Type-1/2 + threshold escalate/abstract	SOP-SG-04	Bezos door, COBIT APO12
arch-review-checklist.md	Gate review arsitektur hulu sebelum lock	SOP-SG-05	COBIT APO03, Well-Architected
reference-arch.md	Pola arsitektur teruji + guardrail buat tim reuse	SOP-SG-05	TOGAF, reference architecture
risk-register.md	Daftar risiko arsitektur + mitigasi sebelum handoff	SOP-SG-06	COBIT APO12
dependency-map.md	Peta dependency & single-point-of-failure	SOP-SG-06	TOGAF F

Coverage cek: tiap SOP Sogeking (PLAYBOOK §3) ada tool pendukungnya — SOP-SG-01→target-arch+c4, SOP-SG-02→nfr-spec+well-architected, SOP-SG-03→trade-off+build-buy, SOP-SG-04→adr+reversibility, SOP-SG-05→arch-review+reference-arch, SOP-SG-06→risk-register+dependency-map.  lengkap.

Output disimpan di: target arch + diagram → `team/sogeking/arch/<scope>.md` (versioned) · NFR → `arch/nfr-<feature>.md` · ADR → `team/sogeking/adr/NNN-*.md` (co-arsip @kakashi, permanen) · trade-off/risk → log / `arch/` · review verdict → `log.md` .

*Tools = **artifact yang dipakai DI DALAM sop/** — SOP kasih prosedur berklasa, tool kasih bentuk konkret yang diisi. Bukan dokumen terpisah; dua-duanya satu alur.*
