

Tool: NFR Spec Template

Apa: spesifikasi NFR ber-target ukur — "seberapa bagus" sistem, bukan "apa fiturnya". Tiap karakteristik mutu dapat angka, bukan kata sifat. **Kapan dipake:** **sebelum** build fitur high-stakes (SOP-SG-02, kontrol SG-C2 — NFR define-before-build). **Framework:** ISO/IEC 25010 (8 karakteristik) × AWS/Azure Well-Architected (5 pilar) · OWASP Top 10 · UU PDP. **Output:** `team/sogeking/arch/nfr-<feature>.md`.

TEMPLATE — tabel ISO 25010 × Well-Architected

ISO 25010 char	Well-Architected pillar	Target UKUR (angka/kriteria)	Cara verifikasi	Owner cek
Performance efficiency	Performance efficiency	latency p95 < __ ms, bundle < __ KB	Lighthouse / profiler	@killua
Reliability	Reliability	uptime __% · RTO __ · RPO __	failure test	@levi
Security	Security	OWASP Top 10 clear · UU PDP: consent + no overwrite	pentest ringan + review	@l
Maintainability	Operational excellence	coupling rendah · change-cost 1 file/fitur	code review	@kakashi
Compatibility	—	jalan di __ browser/device target	manual matrix	@l
Portability	Cost optimization	swappable backend (Type-2) · cost envelope < \$__/bln	review arsitektur	Sogeking
Usability (joint @bulma)	Operational excellence	3-detik-clear (F-2) · task RSVP <= __ tap	usability test	@bulma
Functional suitability (joint @lelouch)	—	acceptance criteria PRD 100%	QA	@l

*Pilar Well-Architected yang **belum relevan untuk prototype** (cth cost cloud) tetap dicatat target arah-nya, ditandai "later" — lihat well-architected-checklist.*

CONTOH TERISI — Fitur RSVP + Gift Wishlist + Notif (high-stakes)

ISO 25010 char	Pillar	Target UKUR	Verifikasi	Owner
Performance	Performance	render undangan p95 < 1.5s di 3G · bundle < 250KB	Lighthouse mobile	@killua
Reliability	Reliability	RSVP submit idempotent (double-tap = 1 record) · RPO 0 (no data loss) · klaim kado atomic	test double-submit + concurrent claim	@levi
Security	Security	input RSVP validated (no XSS) · UU PDP : nama+kontak tamu = data pribadi → consent + akses owner-only + never overwrite (Data SACRED) · no secret di client	OWASP checklist + review @I	@I
Maintainability	Operational excellence	kanal notif di balik interface NotifProvider (swap WA↔email 1 file)	code review	@kakashi
Usability	Operational excellence	RSVP 1 tap (Hadir/Tidak) · wishlist klaim 2 tap · bahasa warung (F-2)	usability test 3 boomer	@bulma
Portability	Cost optimization	data layer Fauxbase swappable ke backend real (Type-2) · cost prototype \$0 (local driver), envelope go-live < \$20/bln	review arsitektur	Sogeking
Functional	—	acceptance PRD Fase 1 (8 komponen) 100%	QA	@I

Gate: semua target ber-angka **sebelum** @killua/@saitama mulai dev. Kalau ada target masih "kira-kira", NFR belum selesai → balik ke draft. Ini bukti kontrol SG-C2.
